

Local Dunkin' Donuts Restaurants Honor Caroline Taylor, RN, CEO of TMD During Thanks to You, Hampton Roads Nursing Community

To kick off the new Dunkin' Donuts, Caroline Taylor was recognized at a reception for the nursing community as the 2009 Nursing Community honoree for Hampton Roads.

Caroline Taylor, RN, founded Taylor Made Diagnostics over 15 years ago which specializes in occupational and industrial medicine as the only clinics in Hampton Roads focused solely on clinical services for employers and their employees. Taylor Made Diagnostics opened its new headquarters on Monday, July 20th. It is the first business in the new Gateway to SoNo at 801 Poindexter Street, Suite 218 in Chesapeake. The Center offers comprehensive employer focused clinical services and Taylor developed an opportunity to bring Southeastern Virginia Physical Therapy Center to SoNo, which adjoins the clinic to provide businesses with industry relevant physical ability assessment and services.

Dunkin' Donuts focuses community involvement with those who serve. The local program is designed to celebrate local heroes in our community and increase awareness of the importance of community involvement. Each month from August through December, a different group is honored with a free medium coffee when they present their ID one day each week of the month.
